Elementary Chatbot for Customer Interaction (E-commerce Example)

```
def chatbot():

    print("Welcome to ShopBot - Your Shopping Assistant!")
    print("How can I help you today?")
    print("Type 'bye' anytime to exit.\n")

    while True:
        user = input("You: ").lower()

        if "hi" in user or "hello" in user:
            print("Bot: Hello! How can I assist you?")

        elif "order" in user:
            print("Bot: You can track your order using the 'My Orders' section on our website.")

        elif "price" in user or "cost" in user:
            print("Bot: Please specify the product name, and I will give you the price details.")

        elif "return" in user or "refund" in user:
            print("Bot: Our return policy allows returns within 7 days of delivery.")

        elif "delivery" in user or "shipping" in user:
            print("Bot: Delivery usually takes 3-5 business days depending on your location.")

        elif "bye" in user:
            print("Bot: Goodbye! Thank you for visiting! ")
            break

        else:
            print("Bot: Sorry, I didn't understand that. Can you rephrase your question?")

# Run the chatbot
if __name__ == "__main__":
    chatbot()
```

OUTPUT Run

Welcome to ShopBot - Your Shopping Assistant!
How can I help you today?
Type 'bye' anytime to exit.

You: hi

Bot: Hello! How can I assist you?

You: what about delivery?

Bot: Delivery usually takes 3-5 business days depending on your location.

You: return policy

Bot: Our return policy allows returns within 7 days of delivery.

You: bye

Bot: Goodbye! Thank you for visiting!
